

Certified as a "Health management establishment" for this year again

2022/4/1

Following last year, we received certification from Oita Prefecture as a "Health Management Business Office".

This is the third time for us to be certified, having been certified since 2020.

What is a "health management business office"?

- (1) Health checkups and response to those found to be in good health
- (2) Employer-led promotion of health promotion
- (3) Measures to prevent passive smoking
- (4) Regular provision of health information
- (5) Health promotion efforts by the entire business site

This term refers to business establishments that meet the above five conditions.

In order to promote health management, Oita Prefecture certifies business offices that meet all five certification criteria as "Health Management Offices".

This year, 708 business offices met the five criteria and received the award.

We actively encourage our employees to undergo regular health checkups and participate in the "Oita Arutokku" health application.

Based on the belief that the "physical and mental health" of our employees is the foundation of our company's growth and development, we will continue our efforts to create a workplace that is vibrant in both body and mind.
