

"Excellent Corporation for Health Management 2024"

We are pleased to announce that we have been recognized as one of the "Excellent Health Management Corporations 2024 (Small and Medium Sized Corporations)" jointly selected by the Ministry of Economy, Trade and Industry (METI) and the Japan Health Council.

Based on the idea that "the health of employees is an indispensable foundation for the company's growth and development," we are actively working on initiatives such as regular health checkups for all employees, cancer screenings at

the full cost of the company, and participation in health walks every year.

In addition, the Company also encourages smokers to quit smoking by providing special leave to visit a smoking cessation clinic and partial subsidies for therapeutic drugs, thereby raising each employee's health awareness and contributing to the maintenance and promotion of employees' physical and mental health.

From April 2024, we will introduce "Cancer Treatment Insurance" to help employees balance treatment and work without worrying about the cost of treatment in the event that they develop cancer.

By enhancing benefit packages, employees can work with peace of mind. We believe that this will lead to improved work engagement and have a positive impact on work performance.
